Council for Development and Reconstruction (CDR)

GREEN, AGRI-FOOD TRANSFORMATION FOR ECONOMIC RECOVERY - GATE

Ref: GATE-IC-Proc-09

Assignment Title: ENVIRONMENTAL SPECIALIST

The Republic of Lebanon represented (The Borrower) represented by the Council for Development and Reconstruction (CDR) as a representative to the Borrower will implement the Green, Agri-food Transformation for Economic Recovery (the "GATE" or "Project"), funded by the International Bank for Reconstruction and Development (IBRD or the World Bank or the Bank). The total project cost is Two Hundred Million United States Dollars (US\$ 200,000,000). The Council for Development and Reconstruction (CDR), an implementing agency of the Client, intends to apply a portion of the proceeds of this loan to eligible payments under the contract for consulting services to be procured under this project.

The consulting services include providing support to the CDR as an **Environmental Specialist** under the project.

The full TOR version can be found on CDR website www.cdr.gov.lb , click on the [Procurement](#) tag for more info.

The Council for Development and Reconstruction (CDR) is in the process of establishing a project coordination unit to assist the CDR in the implementation of the Green, Agri-food Transformation for Economic Recovery (GATE), now invites eligible local experts ("Individual Consultants"), to indicate their interest in providing the required Task. Interested individuals should provide information demonstrating that they have the required qualifications and relevant experience to perform the Tasks by submitting their Expression of Interest ("EOI") and Curriculum Vitae("CV"). The shortlisting criteria are:

Qualifications Requirements:

- Bachelor's degree in environmental engineering or related field with at least 10 years of relevant experience.
- Previous experience with ESIA and ESMP related to infrastructure/agri-food sector.
- Knowledge of and/or experience in application of World Bank's Environmental and Social Framework (ESF) or other internationally accepted environmental impact assessment standards and Lebanese laws and procedures related to environmental impact assessment.
- Familiarity with the WB environmental, health and safety guidelines.
- Demonstrated experience in the field working on development projects;
- Very good English and Arabic writing and speaking skills;
- An ability to produce high quality reports, as demonstrated with a writing sample to be reviewed as part of the hiring process and,

- Willingness to travel to remote areas of Lebanon.

It is preferable to limit the EoI to a maximum of 10 pages including the CV as per attached CV format. Pages beyond 10 will not be reviewed.

The attention of interested Consultants is drawn to Section III, paragraphs, 3.14, 3.16, and 3.17 of the World Bank's "Procurement Regulations for IPF Borrowers for Goods, Works, Non-Consulting services" dated February 2025 ("Procurement Regulations"), setting forth the World Bank's policy on conflict of interest.

Shortlisted Consultants will be invited for interview, upon which a Consultant will be selected for negotiation in accordance with the Individual Consultant Selection described in the "World Bank Procurement Regulations for IPF Borrowers."

The Deadline for receiving EOIs is to be on Tuesday, September 23rd, 2025 at 12:00 o'clock noon Beirut local time

Expressions of Interest (EOI) must be delivered to the address below by hand or carrier including one original, one copy and one electronic CD ROM. Electronic submissions are not accepted

COUNCIL FOR DEVELOPMENT AND RECONSTRUCTION

ENVIRONMENTAL SPECIALIST

I. PROJECT BACKGROUND

The Republic of Lebanon represented (The Borrower) represented by the Council for Development and Reconstruction (CDR) as a representative to the Borrower will implement the Green, Agri-food Transformation for Economic Recovery (the “**GATE**” or “**Project**”), funded by the International Bank for Reconstruction and Development (IBRD or the World Bank or the Bank). The total project cost is Two Hundred Million United States Dollars (US\$ 200,000,000).

GATE Project aims to improve the resilience of farmers and Small and Medium Enterprises (SMEs) in the Lebanese agri-food sector. The project is designed to facilitate access to finance, support climate-smart investments, and restore critical infrastructure services to sustain and enhance the agricultural value chain. Through targeted interventions, it seeks to increase agricultural productivity, strengthen food security, and promote sustainable economic growth. The project is structured into key components focusing on value chain investments, infrastructure development, enabling regulatory improvements, and knowledge management.

The Project is structured into five main components, each designed to strengthen the resilience of Lebanon’s agri-food sector and support farmers and SMEs.

Component 1: Climate Smart Investments in Agri-food Value Chains (US\$71 million):

The objective of this component is to provide access to finance to strengthen the resilience and improve the competitiveness of farmers and SMEs involved in agri-food value chains. The component will promote climate smart practices, create higher value addition, improve links between farmers, agribusinesses and markets, and unlock diversification opportunities. The project will finance activities specifically designed to benefit women and seek to contribute to reducing some of the gender gaps identified in terms of access to finance, inputs, markets, technical capacity building activities, improved confidence and negotiation skills as well as addressing social norms through a carefully designed behaviorally informed outreach campaign, also targeting men.

Component 2: Climate-Smart Infrastructure and Services for Agri-Food Sector Development (US\$100 million):

The objective of this component is to restore service delivery, build operational capacity and ensure the sustainability and climate-resilience of public infrastructure underpinning the agri-food sector. It will be structured across two subcomponents: Subcomponent 2.1. Improving rural community infrastructure for agriculture; and 2.2. Restoring access and protecting agency-managed infrastructure and services underpinning agriculture.

Component 3: Improving the Enabling Environment and Restoring Support Services (US\$21 million)

The objective of this component is to restore and strengthen the capacity of sector institutions to support the recovery and transformation of the agri-food sector.

Component 4: Project and Knowledge Management (US\$8 million)

This component will support the coordination and management of the implementation of the project. It will finance overall project management, including inter alia: (a) coordination among different stakeholders; (b) monitoring and evaluation (M&E), including reporting climate benefits to the MoE to comply with the Paris Agreement reporting requirements; (c) project Environmental and Social Standards (ESS); (d) hiring of a gender specialist; (e) project fiduciary administration, internal controls, and audits; (f) communication and information activities, and (g) the establishment and maintenance of a grievance mechanism (GM) and a citizen's engagement mechanism. timely communication of results. This component will also finance a third-party monitoring (TPM) mechanism, as well as timely communication of results. In addition, the project will recruit a Service Provider (NGO) specialized in child labor prevention and response and who will be responsible for supporting the project in preventing, mitigating, monitoring, and responding to such risks during implementation. It will finance the development of an action plan to combat child labor and a roadmap to improve social protection for farmers.

Component 5: Contingent Emergency Response Component (CERC) (US\$0 million allocated initially)

This component will have zero funding allocation at the onset and will only be triggered in emergency circumstances; the project will support the preparation of a procedure manual governing the CERC operations.

Each component is designed to work together, ensuring a holistic approach to strengthening Lebanon's agri-food sector and supporting economic recovery.

In order to facilitate project implementation, the CDR is establishing a Project Coordination Unit (PCU), to be staffed by professionals, who will lead or support the achievement of the respective project component objectives.

Subcomponent 1.2 of the Project will be implemented by Kafalat which shall provide loans to eligible agribusinesses to finance investments, working capital, and technical services. Kafalat will maintain a Project Management Unit (PMU), staffed with financial and risk management experts, to handle loan disbursement, monitoring, and compliance with World Bank guidelines.

Subcomponent 2.1 of the Project will be implemented by the Green Plan. This sub-component involves investments in climate-smart infrastructure and services. It will work closely with municipalities and stakeholders to develop and prioritize projects such as hill lakes, road rehabilitation, and irrigation improvements. Green Plan will establish a dedicated PMU to oversee implementation and ensure proper coordination.

Consequently, CDR will be responsible for coordinating with both Kafalat and Green Plan and consolidating fiduciary aspects. While Green Plan and Kafalat will manage their respective components independently, CDR will facilitate alignment and coordination to ensure coherence across the project.

II- SCOPE OF WORK AND RESPONSIBILITIES

The CDR is seeking to recruit an Environmental Specialist (ES), to assist with the supervision of environmental safeguard instruments of the project.

The tasks of the ES include:

1. Provide overall environmental management oversight during the implementation of the Project, supporting and advising the client in addressing a variety of environmental issues at all the stages of the implementation of the **Green, Agri-food Transformation for Economic Recovery (GATE)** and in environment related training/awareness raising and coordination activities.
2. Review of various environmental and social submittals made by the consultants such as ESMPs, CESMPs, ESIAs, and the regular monitoring reports on environmental and social performance
3. Oversee the implementation of environmental related activities as outlined in the Environmental and Social Commitment Plan (ESCP) of the project.
4. Prepare necessary documents, such as environmental guidelines and tools in consultation with stakeholders and help the client in commissioning and managing additional and/ or special studies/assessment, if necessary.

5. Ensuring that each subproject and activity under the project is compliant with the national regulations and the WB ESF.
6. Identify non-compliances with the ESF ESSs and propose corrective actions.
7. Prepare guidelines, tools and notes for use in the project based on relevant environmental policies, acts and Lebanese regulations and WB ESF;
8. Carry out environmental screening of subprojects and activities, and help to prepare subproject or activity specific Environmental and Social Impact Assessment (ESIA) and Environmental Management Plans (EMPs) including requirements for resources conservation and pollution prevention, pest management, traffic and road safety and protection of natural habitats
9. Review subproject and activity plan, design, cost, and bid documents to ensure environmental factors and mitigations are incorporated, and subproject/ activity documents and environmental documents are in harmony
10. Carry out regular site supervisions during implementation of subprojects and activities, provide feedback to the PCU and contribute to the regular monitoring reports on the environmental, social, health and safety (E&S) performance of the Project as required under the ESCP.;
11. Identify requirements of permission for setting up observation and measurement system in areas secured for conservation and protection;
12. Communicate with vendors, contractors, and subcontractors for necessary environmental compliance;
13. Evaluate environmental risks associated with floods, landslides, erosion, bank cutting and shifting channel as a result of project activities;
14. Produce report in a manner understood by non-technical people for effective dissemination purpose.
15. Train the PCU, contractors and supervision consultants on environmental management plan and environmental issues associated with the project including occupational health and safety and emergency prevention, preparedness and response in particular the implementation of the ESIA/ESMP.
16. Prepare notification to the Bank of any incident or accident related to the Project which has, or is likely to have, a significant adverse effect on the environment, the affected communities, the public or workers and contribute to the Environmental and Social Incident Response Toolkit (ESIRT) as needed.
17. Coordinate and follow up on the Environment requirements of the activities implemented by the different entities under the project, namely CDR, MoE, MOA, LARI, MoET, and Green Plan and Kafalat's PMU and report on their implementation.
18. Participate in supervision missions and/or meetings with the WB team as required.
19. Review the studies and reports under the project.
20. Update the Project E&S instruments as needed

III- Qualifications and Experience

- Bachelor's degree in environmental engineering or related field with at least 10 years of relevant experience.
- Previous experience with ESIA and ESMP related to infrastructure/agri-food sector.

- Knowledge of and/or experience in application of World Bank's Environmental and Social Framework (ESF) or other internationally accepted environmental impact assessment standards and Lebanese laws and procedures related to environmental impact assessment.
- Familiarity with the WB environmental, health and safety guidelines.
- Demonstrated experience in the field working on development projects;
- Very good English and Arabic writing and speaking skills;
- An ability to produce high quality reports, as demonstrated with a writing sample to be reviewed as part of the hiring process and,
- Willingness to travel to remote areas of Lebanon.

IV. Reporting Line

The ES will report directly to the CDR PCU Project Manager and collaborate closely with technical teams, field staff, and relevant stakeholders.

V. Duration of Assignment

The initial contract duration is 11 months, renewable based on performance and project requirements.

VI. Location

The position will be based at the CDR Offices, with occasional field visits as required.
