2	Referring to Volume 2 - Specifications Architecture & Civil Works, page461 (Section 142100 - Elevator) and the related drawings. We noticed that this section is included in the specifications but missing from the Excel BOQ. Please confirm if it should be added to the BOQ.	Not included in this phase.
3	Referring to BOQ-Div 6- Section 064023- interior architectural woodwork, there is no drawings or sections for the wood Counter.	There is no wooden counter in this project, there are 5 concrete counters covered with marble.
4	Referring to BOQ - Div 8 Section 081113 - Metal doors and Section 081416-Wood Doors, please provide the hardware schedule and details related to these doors.	Hardware shall be hospital-grade, heavy-duty, stainless steel finish, and in full compliance with safety, hygiene, and accessibility requirements. Pls. refer to Attachment -1
5	Referring to the BOQ, we found several items listed with a full description of material and unit, but without the corresponding quantity. Kindly confirm that we should not price it.	All items without quantity are excluded in this phase and should not be priced.

➤ **Mep Work:**

While reviewing the electrical drawings and specifications, we noted several missing details and points requiring clarification:

1. Generator Room

The electrical drawings do not reference a generator room. Please provide the following:

No.	Bidder's Question	CDR Reply / Clarification
1.1	Architectural layout: Room dimensions, acoustic doors, penetrable surfaces, attenuator position.	Refer to Attachment – 2 (generators locations), Refer to Draw. Z101
	Mechanical coordination layout: Duct routing, fan locations, attenuator placement.	Refer to BOQ 16.18.1 & 16.18.2, stating that the generator price includes the canopy (soundproofing works) and muffler. Therefore, they consider no need for the architectural layout and related details.
1.3	Exhaust system layout: Pipe route to termination point.	
1.4	Genset Assembly The tender specifies a genset from a single manufacturer (e.g., CPG - factory assembly). Kindly confirm if local assembly is acceptable or if exclusive factory assembly is mandatory.	Refer to BOQ 16.18.1 and 16.18.2, Yes, Local assembly is accepted, provided that the brands are in accordance with those specified in the BOQ and specifications.
1.5	Acoustic Compliance Requirement of ≤ 65 dB at 3 m outside the room necessitates precise acoustic details. Please provide construction/material specifications to ensure compliance.	The generator is proposed to be installed with canopy ensuring 65 dB at 3 m far from the generator
1.6	Electrical Configuration Confirm whether the generator breaker should be 3-pole or 4-pole to match site grounding and protection scheme.	The generator breakers in the totalizing panel shall be 3 - pole.
1.7	Muffler& Exhaust Routing Clarify If the muffler should be ceiling-suspended or installed on a steel frame. Confirm the exhaust pipe routing and outlet location.	Refer to BOQ item 16.18.2

No.	Bidder's Question	CDR Reply / Clarification
1.8	Fuel Tank Locations Please advise on the required fuel tank locations and related details.	Refer to Draw. A106 Refer to BOQ 15.26.c Refer to BOQ 15.25.A Refer to Draw. M701

2. Building Management System (BMS)

2.1	Electrical specifications reference a BMS (Section 16786). Kindly confirm whether a BMS is included in the project scope.	Not included in this phase.
2.2	We require detailed specifications for the bed head unit, which are currently missing.	Refer to Attachment-3 (Draw. E-004 Revision 1)

3. Video Interphone and Access Door

3	Please provide more details for the video interphone and access door (Electrical BOQ Items 16.23 and 16.24).	The systems are stand-alone type. No specific details are needed.

List # 002:

No.	Bidder's Question	CDR Reply / Clarification
1	Referring to BOQ – Div 5 – Section 055000 – Metal Fabrications – item 5.1.4 (External Fence), we noticed that no drawings or details are provided for this item.	Refer to Draw. A402

List # 003:

1. Regarding the boiler

No.	Bidder's Question	CDR Reply / Clarification
a	Could you please confirm whether the boiler is gas-fired or diesel-fueled?	Refer to Draw M701 Diesel fueled
b	Kindly confirm If the boiler of 310 kW is correct.	Refer to Draw. M008 Yes, capacity of boiler is 310 KW
c	Additionally, we seek clarification on the copper pipe lengths for each pipe size.	Refer to BOQ item 15.39 Copper pipes lengths were computed as a total, length of each size depends on the unit characteristic (Brand).
d	Please also confirm If there are any special accessories required for the gas tank that supplies the main kitchen, as referenced in the water supply drawings (M-101).	No special accessories, price shall be based on common standards submitted by suppliers and contractors.
e	Lastly, we kindly request the CAD version of the relevant drawings for coordination and technical review	The AutoCAD drawings are provided on the CD attached to this Addendum.
f	Please confirm whether the LPG tank in the gas layout is excluded from the scope since it is not mentioned in the BOQ	Not included in this phase.

2. Upon reviewing the provided AC schedules, we have identified several points that require clarification, as the information appears Inconsistent:

a	<p>In M-12, the title reads "capacity schedules of DX inverter concealed units cooling and heating"</p> <p>however, the indoor units listed in the schedule are labeled as FCUs. At the same time, the notes specify that "All AHU for operation rooms shall have the following features", which makes it unclear whether the requirement is for, VRV/DX indoor units, FCUs, or AHUs.</p>	<p>It is intended to the AHU system type for the operating rooms.</p>
---	---	---

	Could you kindly confirm which system type is intended?	
--	---	--

No.	Bidder's Question	CDR Reply / Clarification
b	In M-12 the schedule also includes a "Roof Package Unit". We would appreciate clarification on what exactly is required by this-i.e., whether it refers to a packaged DX unit, AHU with outdoor unit, or another type of equipment.	The two types packaged DX unit or AHU with outdoor unit are acceptable.
c	In M-11, under the " <i>Capacity schedule of Rooftop A/H Units cooling and heating for operation rooms & CCU</i> ", the section labeled "Cooling Coil Section" includes a note stating that " <i>the unit shall have DX outdoor unit standby</i> ". It is unclear whether this system is intended to be DX or water-cooled . Could you please confirm?	This unit shall be DX
d	Referring to our previous communication, we would also like to clarify the summer outdoor design temperature indicated in the schedules. The listed value is 115°C (46 °C), which appears unusually high. Kindly confirm if this is the correct design condition.	The summer outdoor design temperature is 115°F (46 °C). Refer to Draw M10

3. Fans EF-TRF-3 and EF-TRF-4

3	<p>Fans EF-TRF-3 and EF-TRF-4 are mentioned in the schedule but do not appear in the BOQ. Please confirm whether these fans are to be included in the scope.</p>	Refer to attachment - 4
