## **1.6 REQUESTED SERVICES (AND CONTEXT)**

The project “Al Ghadir Wastewater Phase II” intends to finalize the unfinished infrastructure from Phase I which was carried out in the 2010s. Due to the severe crisis in Lebanon, the original project was left unfinished and parts of the wastewater network cannot yet go into operation.

Prior to project implementation of the first phase, no wastewater network existed for the majority of the service areas. Household wastewater was mainly disposed of through septic tanks. Since these were usually not sealed, part of the wastewater seeped into the mainly karstic subsoil and contaminated the groundwater. During heavy rain events, the septic tanks were frequently flooded, resulting in uncontrolled surface runoff of domestic sewage via public roads to the nearest receiving watercourse.

To tackle these issues the program "Al Ghadir Wastewater Disposal" was implemented in the 2010s and served the wastewater disposal of 11 small centers in the district of Aley, in the south of Beirut, with a total population of currently about 330,000 inhabitants. At the time of the project appraisal, it was planned to connect the project area to a main collection line along the coast and thus to the existing Al Ghadir wastewater treatment plant (WWTP). In addition, it was planned to convey the dry weather runoff of the Al Ghadir River to the treatment plant via a sewer line in order to prevent pollution of the river and thus a direct discharge of pollutants into the sea.

During implementation, the project-executing agency (PEA), the Council of Development and Reconstruction (CDR), decided to expand the original package of measures through a Lebanese contribution in addition to the German Loan. However, due to the severe crisis in Lebanon, the PEA was no longer able to finance its own contribution for the additional pipelines. Due to outstanding work on a main collector financed by CDR, the pump station and the wastewater networks connected to it (approx. 20% of the total wastewater volume) cannot yet go into operation.

Furthermore, the project aims to complement and finalize a sewage system outside of the scope of Phase I towards the south. This area was left with an unfinished system, remaining unconnected to the Al Ghadir WWTP at the coast. The collector systems in the villages have only partly been finalized, with households being connected to the system to varying degrees. In many instances, the sewage system cannot be used yet, and where it is being used, the wastewater drains into open areas due to the unfinished connections.

The project aims to close the missing links in the main sewer system including pumping stations and to finalize the collection systems in the villages.

CDR in this tender process is seeking to engage a qualified consultant to perform consulting services to support the implementation of the above-described measures. The intended consultant's services can be summarized as follows (to

be treated indicatively, further descriptions will follow with a subsequent Request for Proposal):

**Stage 1: Assessment Study, including:**

- Verification of the existing Feasibility Study (these will be shared with the bidders at a later stage)
- Propositions for a 2-years operation phase by the Contractor
- Considerations for supporting photovoltaic plant for covering the operation costs of the pumping station
- Methodologies for illegal connections, house connection campaigns, analysis for wastewater quantities and quality
- Gender Policy considerations

**Stage 2: Detailed Design stage, including:**

- House connection survey, measurement campaigns, other required surveys
- Prepare detailed design
- Prepare full-fledged ESIA and ESMP including possibly required additional studies to determine the baseline
- Prepare bidding documents

**Stage 3: Assistance during Bidding, including:**

- Assistance during Bidding

**Stage 4: Assistance during Construction Supervision, including:**

- Assistance during Construction Supervision including ESHS-monitoring
- Assistance during Taking-Over and comprehensive system commissioning

**Stage 5: Assistance during DNP, including:**

- Assistance during Defects Notification Period (DNP)

**Stage 6: Assistance during O&M, including:**

- Development of Operation and Maintenance Plans and Training of Staff on Operation and Maintenance (O&M)

In parallel to all Stages, the Consultant will ensure a professional project management during the complete assignment.

### 1) Sanctionable Practice

The PEA and the Contractors (including all members of a Joint Venture and proposed or engaged Subcontractors) must observe the highest standard of ethics during the Tender Process and performance of the Contract.

By signing the Declaration of Undertaking the Contractors declare that (i) they did not and will not engage in any Sanctionable Practice likely to influence the Tender Process and the corresponding Award of Contract to the PEA's detriment, and that (ii) in case of being awarded a Contract they will not engage in any Sanctionable Practice.

Moreover, KfW requires to include in the Contracts a provision pursuant to which Contractors must permit KfW and in case of financing by the European Union also to European institutions having competence under European law to inspect the respective accounts, records and documents relating to the Tender Process and the performance of the Contract and to have them audited by auditors appointed by KfW.

KfW reserves the right to take any action it deems appropriate to check that these ethics rules are observed and reserves, in particular, the rights to:

<b>Corrupt Practice</b>	The promising, offering, giving, making, insisting on, receiving, accepting or soliciting, directly or indirectly, of any illegal payment or undue advantage of any nature, to or by any person, with the intention of influencing the actions of any person or causing any person to refrain from any action.
<b>Fraudulent Practice</b>	Any action or omission, including misrepresentation that knowingly or recklessly misleads, or attempts to mislead, a person to obtain a financial benefit or to avoid an obligation.

**Obstructive Practice** Means (i) deliberately destroying, falsifying, altering or concealing evidence material to the investigation or the making of false statements to investigators, in order to materially impede an official investigation into allegations of a Corrupt Practice, Fraudulent Practice, Coercive Practice or Collusive Practice, or threatening, harassing or intimidating any Person to prevent them from disclosing their knowledge of matters relevant to the investigation or from pursuing the investigation, or (ii) any act intended to materially impede the exercise of KfW's access to contractually required information in connection with an official investigation into allegations of a Corrupt Practice, Fraudulent Practice, Coercive Practice or Collusive Practice.
