

إجابات وتوضيحات (رقم ٨) على بعض الاستيضاحات العائدة
للمناقصة العمومية لتلزيم تشغيل وصيانة وتأهيل وكتابة برامج جديدة
في الصندوق الوطني للضمان الاجتماعي (CNSS / 1646 / 2025)
والتي ستجري بتاريخ 02/09/2025

1. What is the purpose of the API management functionality? Is it intended for viewing and managing APIs within any ready products, or is it designed to serve as a standalone application for other use cases

Please refer to the TOR Paragraph 9.2 API Management Platform Requirements.

The API Management Platform will be utilized by different future integrations with the NSSF (hospitals, pharmacies, doctors, administrations, etc.).

The API Management Platform will have to manage the whole lifecycle of APIs such as: API Publishing, API Developer Portal, Service Catalogue, API Analytics, API Gateway, Key Manager, Traffic Manager, API Security, API Performance, etc.

Note: There is no need for any ready product.
